

## Comment in MAR for second RN check of immunotherapies

The dual sign off only shows up for medications that have been programmed into EPIC as being High Risk Medications. Immunotherapies may not have prompt for dual sign off, but a second RN/APP is required to independently check and verify the medication per Seidman nursing practice.

**Infusion Medication**

ondansetron (Zofran) 16 mg in dextrose 5% 50 mL IVPB <sup>Ⓔ</sup> Dose: 16 mg : 200 mL/hr : intravenous : Once
